

Automatic blaster equipment

Spice EPORE

Reduce manpower workload

The machine automatically blasts glass beads into a rotating tumbler, allowing you to leave the machine and do other work.

Reduce work time

This reduces the time required by about 30%* compared to manual work, and by about 70%* for fine shapes, improving production efficiency.

*Based on in-house results

Unified quality

It also improves quality by providing a uniform finish.

Before processing

After EPORE (processing time 4 min)

▶▶▶ Aspect point ◀◀◀

Extending the blasting time also results in a smoother surface finish.

4 minutes

SGK-4LD-401

► Specification SGK-4LD-401

Product external dimensions:	W1210 x D1090 x H2300 mm (dust collector : W850×2325mm)
Product weight:	280kg
Power consumption:	3-phase 200V (50/60Hz)
Air consumption:	0.69m ³ /min(0.4MPa)
Required compressor capacity *	5.5kW(7.5hp)

*Required compressor capacity will vary depending on processing conditions such as processing pressure and continuous spray time.
